

# COMPLETE

## Water Conditioner

- Promotes healing
- Rejuvenates slime coat
- Removes chlorine, ammonia, and chloramines
- Detoxifies nitrite and heavy metals
- Adds essential electrolytes
- Boosts alkalinity
- Works instantly
- Refillable packaging keeps customers returning and is eco-friendly

**Dosage:** To fully condition water for (1) new aquariums or ponds, (2) before, after or during water additions, or (3) before adding new fish, amphibians, or plants, add 1 teaspoon (~5mL) **AquaLife COMPLETE™** per 10 gallons of water.

**LARGER AQUARIUMS AND PONDS:** Add 1 fluid ounce per 60 gallons of water.

**TO ELIMINATE AMMONIA:** Measure total ammonia or ammonia-nitrogen using a salicylate (indophenol) type test kit. For each 1.0 mg/L (or fraction thereof) of measured total ammonia or for each 0.85mg/L of measured ammonia-nitrogen add 1 teaspoon of **Aqualife COMPLETE™** per gallon of water.

**NITRITE REMOVAL:** Add 1 teaspoon per gallon, then test water for nitrite. If nitrite persists, add a second dose and test again.

**AquaLife COMPLETE™** offers serious hobbyists the most advanced all-in-one water conditioner and stress reliever available. **AquaLife COMPLETE™** is concentrated to deliver twice the conditioning power of other products, while also reducing the chance of illnesses associated with stress. No other water conditioner does more to keep aquatic livestock thriving and healthy.

**Product: COMPLETE**

**Category:** Additives and Supplements, Aquarium; Additives and Supplements, Ponds

**Unique Product Features:** All-in-one formulation that instantly removes and de-toxifies ammonia, chlorine, chloramines, nitrite and heavy metals while boosting alkalinity, adding essential electrolytes and rejuvenating fishes' slime coat. Completely conditions water for fresh or saltwater aquariums.

**Packaging:** 4-ounce, 16-ounce and 1 gallon bottles, 5 gallon container for refills

**Product Rationale**

**Aqualife COMPLETE** was developed to reduce stress and prevent livestock loss. Along with the ability to remove 1 ppm ammonia and nitrite in emergency situations, **Aqualife COMPLETE** can actually reduce the chance of saltwater fish from getting diseases and infections from stress and slime coat damage. Fish react with stress whenever this coating is broken, and their bodies rapidly work by increasing their metabolism to repair any damage to this coating. Aqualife COMPLETE protects any damaged area with multiple layers of coating and relieves this stress. It will not harm corals or clog fish gills.

The various components making up the proprietary Aqualife COMPLETE formula work together not only to condition water for aquarium use, but to dramatically reduce stress on fishes and promote healing. Aqualife COMPLETE should be used to condition all aquarium water, whether or not it has been previously treated via reverse osmosis (RO), as it will eliminate and detoxify components that RO does not remove, such as free chlorine.

**Aqualife COMPLETE** does not contain anything toxic or harmful that will be absorbed by any aquarium organisms. That is why it is one of the few products that the FDA has approved for use with the shrimp and food fish industry.
